

# CREATING A FORM FROM SCRATCH IN FRONTPAGE

Insert | Form | Form.

A rectangular area outlined with a dashed line is created; this form area contains a **Submit** and a **Reset** button. Inside this box, you can add form components, such as text boxes, text areas, option/radio buttons, check boxes, drop-down boxes, and command buttons. (The form box is not visible in the browser view.)

The diagram illustrates the structure of a form in FrontPage. At the top, a dashed-line box contains 'Submit' and 'Reset' buttons. Below this, a larger dashed-line box is titled 'Examples of Form Components in FrontPage'. Inside this box, various form elements are shown: a 'Textbox', a 'Text Area', a 'Checkbox', an 'Option button', a 'Drop-Down Box', and a 'Command Button'. Below the 'Command Button' is another 'Submit' and 'Reset' button. A callout box with an arrow pointing to the bottom buttons says 'These buttons are part of the form.' To the left of the main diagram, a separate dashed-line box shows 'Submit' and 'Reset' buttons, with text explaining that all parts of the form must be contained within the form box.
